For Immediate Release
January 20th, 2023

SEATAC, WA | January 20th, 2023 – Basta Boatlifts continues to lead industry innovation with the release of 3 all-new products, premiering for the first time at the 2023 Seattle Boat Show.

10,000 LB Aluminum Hydraulic Boat Lift – Basta Boatlifts legendary strength is now available at increased size with the new 10,000 LB Capacity Aluminum Hydraulic Boat Lift. This addition to Basta's Aluminum lineup of lifts boasts Basta's Forward Drive Cylinder™ technology, with dual chrome plated stainless steel cylinders pushing the full length of the H-Frame for the smoothest launch known to the boat lift industry.

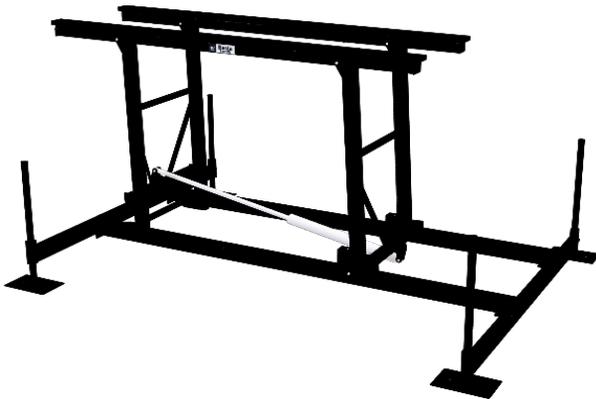

Basta aluminum lifts are famous for their customizability, and the new 10,000 LB aluminum lift is just that! This lift is designed to allow the installer the ability to make final to-the-centimeter modifications as the lift is placed, while also remaining adjustable to accommodate fluctuating water levels through the course of the season.

As wake sports continue to grow in popularity, and boats increase in size every year, the new Basta 10,000 LB aluminum lift is positioned to provide customers the elite experience they expect at their dock.

Sport Launch Platform (SLP) – One structure makes every water sport possible! The SLP will launch your jet ski on one side, and all your other paddle sports on the other. The SLP's center walkway remains fixed, while the platform raises and lowers for simple launching of your kayak, paddle board, E-Foil, and more. The platform is fully customizable, with some customers choosing to design it as a shallow swimming area or extended deck space.

Painted Epoxy Sealed Galvanized Steel Boat Lifts – A new way to customize your lift – direct-to-metal epoxy coated galvanized steel. This lift has dual shielding against corrosion – first a metallurgical bond of protection from galvanization, then a coating of premium marine-grade epoxy paint. This process makes the lift's structure more environmentally friendly, is easier to clean, and maintains its 'new' polished look for longer. A variety of colors are available to make a bold statement, and match your boat, dock, or property.

You can find all these new products on display in the Basta Boatlifts display at the 2023 Seattle Boat Show: Lumen Field, February 3rd – 11th (East Hall, Booth 1111).

About Basta Boatlifts

Basta Boatlifts is the leader in hand-crafted hydraulic boat lifts, seaplane lifts, and PWC lifts. Its product line includes fabrication in both proprietary aluminum and galvanized steel. Known as the originators of the Over-Center™ gravity locking design that changed the boat lift industry, we continue to lead the market.

Basta Boatlifts is a privately held company headquartered outside of Seattle, Washington. For more information, visit bastaboatlifts.com or contact us at 1-866-462-2782.
